CARGO FLOW AFRICA
TRANSPORT GROUP

WHO WE ARE

YOUR CONNECTION TO RELIABLE TRANSPORT CAPACITY

Cargo Flow Africa Transport Group is an African transport brokerage and logistics coordination company connecting businesses that need to move cargo with transport operators capable of meeting their requirements.

We work with commodity traders, mining companies, agricultural businesses, manufacturers, suppliers, distributors and other commercial cargo owners to identify suitable transportation solutions.

Our business operates through a network-driven model. Rather than depending on a single fleet, we source transportation capacity from a broader network of operators, allowing us to respond to different cargo volumes, vehicle requirements and transport routes.

We understand that successful cargo movement depends on more than vehicle availability. Timing, communication, appropriate capacity and dependable execution are equally important.

Our role is to simplify the process of finding and coordinating the right transport solution, helping businesses move their goods with greater confidence.

Our Vision

To become a trusted African transport brokerage network connecting cargo owners with dependable transport capacity across the continent.

Our Mission

To simplify cargo transportation through efficient transport sourcing, reliable coordination, transparent communication and strong commercial partnerships.

Connecting cargo owners to capacity. Connecting businesses to opportunity.

OUR SERVICES

TRANSPORT SOLUTIONS BUILT AROUND YOUR CARGO

Cargo Flow Africa Transport Group provides transport brokerage and logistics coordination services designed to connect cargo requirements with suitable transportation capacity.

01

Transport Brokerage & Truck Sourcing

Identifying available transport operators and suitable vehicles based on cargo type, volume, route and operational requirements.

02

Commodity & Bulk Cargo Coordination

Supporting the transportation of minerals, agricultural commodities, industrial materials and other bulk commercial cargo.

03

Local & Cross-Border Transport Coordination

Connecting shippers with transport operators capable of servicing local and regional routes, subject to applicable requirements.

04

Load & Capacity Matching

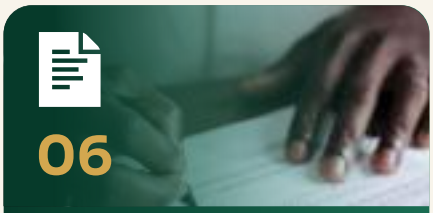

Matching transportation requirements with available vehicle types, carrying capacities, routes and loading schedules.

05

Shipment Communication & Coordination

Facilitating communication between shippers and transporters throughout the agreed transportation process.

06

Transport Documentation Support

Assisting with coordination of relevant transport information, delivery documentation and administrative requirements.

CARGO & INDUSTRIES WE SUPPORT

MOVING THE COMMODITIES THAT DRIVE BUSINESS

Cargo Flow Africa Transport Group supports businesses operating across a broad range of commodity and commercial sectors.

Our network is intended to facilitate transportation requirements involving:

MINING & MINERALS

Minerals, coal, metals, mining commodities and related bulk materials.

AGRICULTURE

Agricultural products, grains, cereals, fertilisers and agricultural inputs.

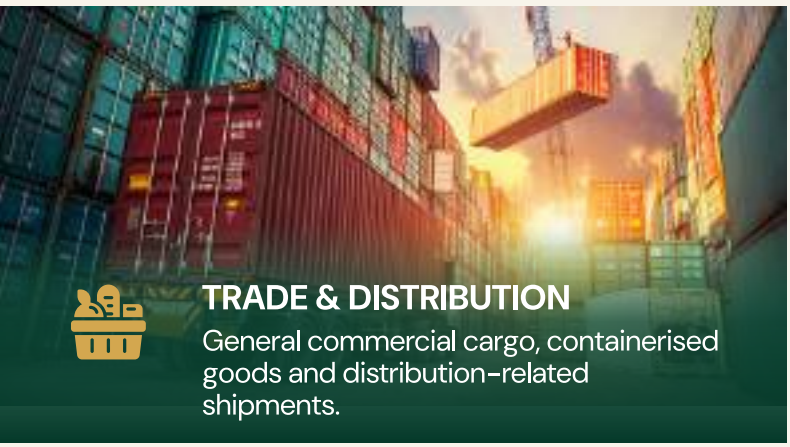

CONSTRUCTION & INFRASTRUCTURE

Cement, building materials, construction supplies and related products.

MANUFACTURING & INDUSTRY

Industrial raw materials, manufactured products and commercial supplies.

TRADE & DISTRIBUTION

General commercial cargo, containerised goods and distribution-related shipments.

PROJECT & SPECIALISED CARGO

Cargo requiring particular vehicle configurations, handling arrangements or transportation specifications.

OUR PROCESS

FROM CARGO REQUIREMENT TO DELIVERY

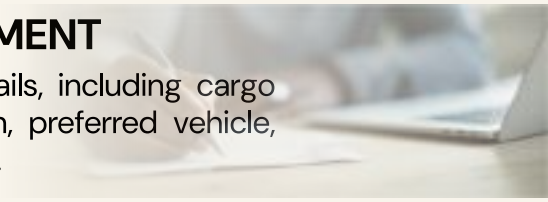

A straightforward process designed to keep your business moving.

We coordinate the connection between cargo owners and transport operators through five key stages.

1

UNDERSTAND YOUR REQUIREMENT

You provide the essential shipment details, including cargo type, quantity, loading point, destination, preferred vehicle, required dates and any special conditions.

2

SOURCE SUITABLE TRANSPORT CAPACITY

We identify potential transport operators from our network based on vehicle availability, carrying capacity, route suitability and operational requirements.

3

MATCH & CONFIRM

We facilitate communication between the relevant parties to confirm vehicle suitability, availability, transportation rates, scheduling and commercial terms.

4

COORDINATE THE MOVEMENT

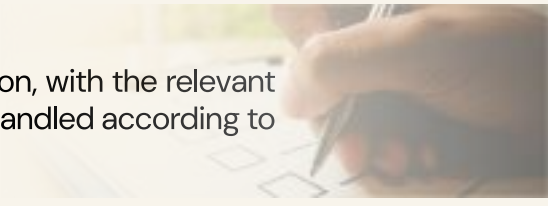

Once arrangements are confirmed, the transporter undertakes the shipment while Cargo Flow Africa supports communication and coordination throughout the movement.

5

DELIVERY & COMPLETION

Cargo is delivered to the agreed destination, with the relevant delivery information and documentation handled according to the agreed arrangements.

OUR NETWORK

CONNECTING TRANSPORT CAPACITY ACROSS AFRICA

A broader network creates greater possibilities.

Cargo Flow Africa Transport Group has developed relationships with fleet owners, independent transporters, regional operators and specialist transportation businesses.

Our network-driven approach allows us to identify potential transport solutions beyond the limitations of a single fleet.

- **Suitable vehicle capacity and route capability**
- **Appropriate operating licences and documentation**
- **Relevant insurance and regulatory compliance**
- **Professional conduct and dependable communication**
- **Commitment to cargo and road safety**

REGIONAL CONNECTIVITY

Botswana • **South Africa** • **Zimbabwe** • **Zambia** • **Namibia** • **Mozambique** • Eswatini • Lesotho • Malawi • Tanzania • Democratic Republic of Congo • Angola

One network.
Multiple routes.
Greater possibilities.

WHY PARTNER WITH US

MORE THAN A TRANSPORT CONNECTION

A logistics partner focused on making cargo movement simpler.

Cargo Flow Africa Transport Group is built around a network-driven brokerage model designed to give businesses access to transportation capacity without relying exclusively on a single fleet.

GREATER ACCESS TO CAPACITY

Source suitable transport operators through a broader network of fleet owners and commercial transport businesses.

FLEXIBILITY

Identify transportation options suited to different cargo types, shipment volumes, vehicle requirements and routes.

RESPONSIVE COORDINATION

Receive support in identifying transport solutions and responding to changing shipment requirements.

CLEAR COMMUNICATION

Maintain better coordination between cargo owners, transport operators and other relevant parties.

REGIONAL CONNECTIVITY

Access potential transport solutions for local and cross-border movements through our developing network.

PROFESSIONAL PARTNERSHIPS

Work with a business that values reliability, transparency, safety, compliance and long-term commercial relationships.

OUR COMMITMENT

We aim to build lasting partnerships by understanding our clients' transportation requirements, communicating transparently and coordinating suitable transport solutions.

LET'S KEEP YOUR CARGO MOVING.
